

IMAGINE HOME

IMAGINE EVERY VETERAN IN LOS ANGELES
HAS A PLACE THEY CAN CALL HOME.

In January 2016, in collaboration with Vets Advocacy, the Secretary of the VA adopted the Draft Master Plan Framework as the official policy of the VA West Los Angeles campus. The Draft Master Plan Framework is the culmination of a veteran and community outreach process that began in June 2015, and represents unprecedented input and response to VA with over 100 meetings and over 1,100 responses in the Federal Register. Vets Advocacy, with support from the local veteran community, was the single largest contributor driving 338 individual public comments totaling 30% of respondents. The comments and data collected during this period were carefully reviewed and incorporated to reflect and address veteran and stakeholder interests in the planning process.

Veteran Housing neighborhoods are distributed throughout the site. Central to the campus is the most secure and protected neighborhood of permanent supportive housing for homeless veterans on the “high ground,” with its own neighborhood services.

Reintegration Zone is located in the current “industrial district” of the campus, focused on veteran reintegration, with opportunities for education and employment training, workshop and gallery space for the arts, and incubatorspace for nurturing veteran-initiated start-ups.

Town Center is located in the geographic center of the campus, touching on each of the primary veteran neighborhoods as a place of common contact.

Medical District, south of Wilshire, with the repurposed hospital and with plans for a new bed tower, has an array of inpatient and ambulatory care facilities, a variety of hospitality facilities for hospital visitors and their families, and additional supportive housing options.

Neighborhood Centers are located throughout the campus, are connected to each residential neighborhood, and provide focused supportive services and amenities.

Accessible and programmed **Open Space and Recreation** are located throughout the campus.
